➤ NPRM Proposals

➤ Re-configuring the public safety allocation – the Broadband Optimization Plan

- The BOP maintains the same level of OOB protections as exist under the current band plan
 - The lower 1.5 MHz of the public safety allocation is broadband-only and carries with it traditional CMRS OOB protections
 - Traditional CMRS protections provide the opportunity for public safety to be directly adjacent to commercial broadband, thus facilitating public-private partnerships and allow the re-configured A Block the ability to have its rules harmonized with the C&D Blocks
